## 関ログローバル研究会

(as of Aug. 20, 2013)

- 1. Theme: The Urban-Rural Gap and Sustainable Shared Growth
- 2. Seminar Abstract: The Philippines is in dire need of achieving shared growth, whereby there is a good balance between efficiency and equity. With the onset of significant changes in the climate, the environment has also become an important factor. There is, therefore, the urgent need for inter-disciplinary, inter-sectoral, and inter-national discussions and actions that would contribute to sustainable shared growth. One major facet of sustainable shared growth is the urban-rural gap, which is manifested in part by the net flow of resources to the city to the detriment of the countryside. While it is in the interest of efficiency that urban development is promoted, this should not overly sacrifice the other goals of equity and environment. This discussion need not be limited to the level of urban-rural but could also be extended to any level where the centralization vs. decentralization issue becomes relevant to the KKK discussions. [Note: KKK stands for Kahusayan (Efficiency), Katarungan (Equity), and Kalikasan (Environment)] In this sense, urban could be taken as the core, and rural as the periphery.
