Goal clarification of the seminar; language translation by technology, hence our country and era

The whole discussion was good and pleasant. The presentors are able to explain briefly their topics.

Well informative

I don't understand the English Accent of the some speakers but in totality it's a good presentation.

Excellent overall

Congratulations for the success of the seminar. I learned some insights about the economy of Asia

Please continue your program - おつかりさまでした

The research topics shared/discussed by the presentors are all very good and relevant. I suggest that seminars like these be participated by more graduate students and make it part of their course activity like requesting them to attend the seminar and submit a reaction paper.
